

SCi's Relocation Services have relocated multiple Federal agencies in the DC region. We have in-house capability to conduct Site Surveys, assess conditions, develop relocation management strategy, design spaces and select furniture, manage construction, conduct relocations and material distribution, and maintain Inventory. Our space designers are certified AutoCAD, Revit, BIM and LEED practitioners, and are prepared to assess and integrate existing and new building plans as spaces are assigned. Our Interior, IT Infrastructure and Audio Video capabilities support relocation efforts, making transition to new spaces and IT systems swift, dependable, and on schedule.

- Documentation, Guarantee, Punchlist
- Manage Inventory & Chain-of-Custody

Project Management

Our Project Management Approach can best be described as serving as the "Owner's Representative": we strive to be the customer's advocate and trusted advisor. We take the customer's viewpoint in terms of impact, value and achievement of success, while incurring minimal disruption to ongoing activities. Our managers have worked with a variety of trades and practices, and thus are able to deliver cross-discipline performance that bridges the complexities of relocation activities.

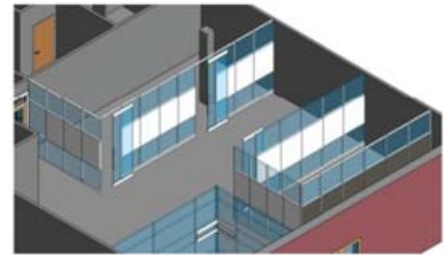

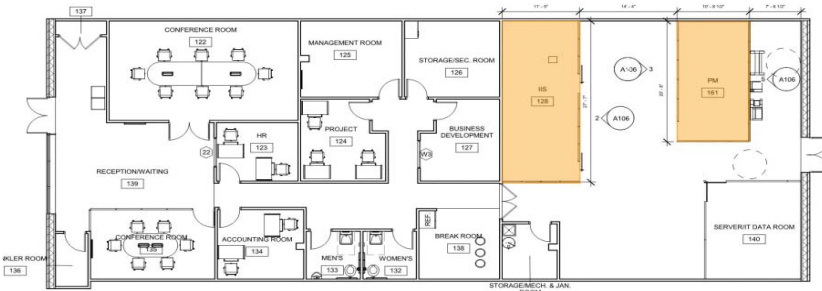

Our PMI-Certified Project Managers performs the processes of complex decision making, planning, implementing, controlling, and documentation of projects using the PMP Book of Knowledge and Best Practices. Our LEED practitioners work for environmentally-conscious clients who desire sustainable choices in source locations, material selection, and interior design to promote natural air circulation and lighting. Our AIA member architects are current in local codes and best practices as applied to interior design. SCi's management processes are in compliance with ISO 9001-2008, ensuring consistency of practice and delivery across complex projects.
